**3M™ Personal Safety Division:
Head & Face Protection**

3M™ Safety Helmet Series H-700

**Experience full-shift comfort and
integrated protection options with
the 3M™ Safety Helmet Series H-700.**

Introducing our most affordable, full-featured safety helmet.

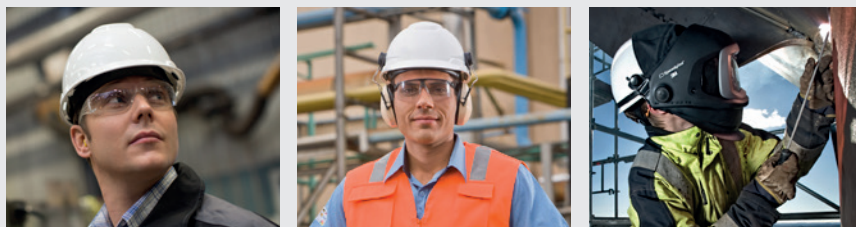

The key to the H-700's comfortable design is its exclusive suspension system: the headband has ventilation holes for better comfort. The smooth ratchet option means the headband will adjust to your precise comfort setting.

This lightweight, low-profile helmet stays balanced and stable on your head, while its compact shape goes almost anywhere. And you feel cooler with the ventilated brow strap and optional top-of-helmet air vents.
